§172.890 Rice bran wax.

Rice bran wax may be safely used in food in accordance with the following conditions:

(a) It is the refined wax obtained from rice bran and meets the following specifications:

Melting point 75 °C to 80 °C. Free fatty acids, maximum 10 percent. Iodine number, maximum 20. Saponification number 75 to 120.

§172.892 Food starch-modified.

Food starch-modified as described in this section may be safely used in food. The quantity of any substance employed to effect such modification shall not exceed the amount reasonably required to accomplish the intended physical or technical effect, nor exceed any limitation prescribed. To insure safe use of the food starch-modified, the label of the food additive container shall bear the name of the additive "food starch-modified" in addition to other information required by the Act. Food starch may be modified by treatment prescribed as follows:

- (a) Food starch may be acid-modified by treatment with hydrochloric acid or sulfuric acid or both.
- (b) Food starch may be bleached by treatment with one or more of the following:
